

Creating a sequential playback list

1. Open the "CONSOLE" APPLET in your Symphony Control Software
2. Click the List Tab
3. Drag and drop Spot Names (MPEG clips) from the Directory Grid on the left to the List Grid on the right.
4. This List is now only on your Desktop PC. (aka List Grid)
5. Press the List Save Speed Button to send and save the List to the digital player.
6. A confirmation window will pop up. Confirm List Save
7. To start the new list, press Stop then Play on the control panel

Note: The units configuration will play a large roll in how the Schedule is executed, be sure that the configuration variables match the desired functionality as listed below.

1. Click Configuration Tab.
2. Click Transport Tab
3. Change **Repeat to ALL**
4. Change **Startup to ON**

See configuration variable pages for additional configuration settings
